Summary

Motivated MCA student seeking opportunities to apply technical knowledge, problem-solving abilities, and development skills in a dynamic and growth-oriented environment. Eager to contribute to innovative projects while continuously enhancing my expertise in software development, database management, and emerging technologies.

Projects

Turfkick

- Developed a turf booking platform where teams can reserve sports turfs and equipment through scheduled time slots.
- Implemented a time-slot reservation system to manage bookings efficiently.
- Enabled turf owners to register and list their turfs on the platform for users to book.

SkillNest

- Developed a student learning platform where users can enroll in courses and prepare for their dream careers.
- Implemented 24/7 AI-based learning assistance, progress tracking, and mentor support from global experts.
- Enabled student collaboration and networking within the platform

Cybersecurity Threat Detector

- Developed a cybersecurity threat detection system to identify suspicious activities and potential security threats.
- Implemented monitoring and alert mechanisms for detecting abnormal system behavior.
- Designed a user-friendly interface for viewing threat reports and security logs.
